

A WORLD OF POTENTIAL BOMBS

Fissile Material Inventory 2020.6

· Fissile materials are Highly Enriched Uranium(HEU) and plutonium (Pu) which can be used for nuclear weapon.
· Fissile materials owned by non-nuclear weapon countries are shown only as total of materials owned by all non-nuclear weapon countries except separated plutonium owned by Japan.
*Global map is drawn as a design and thus may not be accurate.*All data are as of the end of 2018.
*The stockpile of fissile materials includes estimated ones with large uncertainties and thus total quantities are expressed in rounded numbers.
