

A WORLD OF POTENTIAL BOMBS

Fissile Material Inventory 2021.6

• Fissile materials are Highly Enriched Uranium(HEU) and plutonium (Pu) which can be used for nuclear weapon.
• Fissile materials owned by non-nuclear weapon countries are shown only as total of materials owned by all non-nuclear weapon countries except separated plutonium owned by Japan.
※Global map is drawn as a design and thus may not be accurate.※All data are as of the end of 2019.
※The stockpile of fissile materials includes estimated ones with large uncertainties and thus total quantities are expressed in rounded numbers.
